## EXPERIENCE

### Borso Roofing

Contract Web Developer, 2023 - Present

Borso Roofing is a roofing company where I provide contract web development and SEO services to enhance their online presence and customer reach.

#### Responsibilities:

- Developed a custom WordPress theme and plugin from scratch using TypeScript, React, and PHP.
- Manage and maintain the WordPress site, ensuring performance and security.
- Optimize site SEO to improve search engine rankings, and visibility.
- Implement new features and updates based on business needs.
- Drive new customer leads through targeted local SEO strategies, improving search rankings for roofing services in their area.

### Callibrity

Full Stack Software Developer Associate, 2022

Callibrity is a software consultancy with diverse clients from middle-market to enterprise companies across the United States.

#### Responsibilities:

- Turn customer requests into actionable user stories.
- Migrate features from legacy platform to new platform.
- Implement and test user stories.
- Review changes to maintain software quality, performance, and security.
- Demonstrate deployed platform changes to client and apply feedback.
- Resolve help-desk tickets.

### RELEVANT EXPERIENCE

#### Simple Share

2021-2021

Simple Share is a software utility to simplify wirelessly sending information between multiple people and devices. Powered by Google Cloud Platform, Simple Share can send text or files anywhere that Simple Share is available including Android and Windows. I designed and developed both the mobile and desktop applications using Typescript, ReactJS, React Native, Electron, and Redux.

Simple Share consists of five open-source projects:

- Simple Share Electron: A cross-platform desktop implementation of the Simple Share client.
- Simple Share React Native: A cross-platform mobile implementation of the Simple Share client.
- Simple Share Common: Common features and code used by the clients.
- Simple Share Firebase: Configuration data and serverless functions for deploying to Firebase.
- Omnifire: A compatibility layer built around the Javascript and React Native Firebase libraries to provide a consistent API on both platforms.

#### Bachelor's Degree in Computer Science

Franklin University | 2018 – 2021

I graduated summa cum laude with a GPA of 3.96.

Relevant coursework:

- Data Structures
- Object-Oriented Design
- Mobile Programming
- Human-Computer Interaction
- Database Management

Achievements:

- President's List for 7 semesters
- Dean's List for 1 semester
